RESPITE.—We learn that his Excellency Governor ORR has respited the prisoner John Jenkins (colored) until July 12th. Jenkins was found guilty of the murder of Mr. BRANDFORD at the January session of the Civil Court. His counsel appealed from this decision, but the sentence of the Court was sustained, and Jenkins was condomned to be hung on the 14th of June. There was little doubt of the guilt of Jenkins, and we trust that there will be no mistaken clemency displayed in his case.

HOMICUDE.-A difficulty having occurred some days ago on John's Island, at Jenkin's plantation, between two colored men named Scipio Fraser and John Green, the latter attacked the former with a large knife and stabbed him in the side, the knife breaking and leaving the blade in the wound. Fraser died after much suffering, and United States Detective MIGHEL was sent over to arrest Green on Tuesday last, which he did, and has lodged him in jail. When the detective reached the island he found Green working in the field, and on approaching him he made a demonstration with his hoe, which Mr. MICHEL soon settled by exhibiting a revolver, and he afterwards was brought along unresistingly. Green was formerly attached to the Twenty-third Regiment Massachu-

WHEAT! WHEAT! We refer our readers to an advertisement from Messrs. SEENHOUSE & Co., No. 110 East Bay, in which they apply for 10,000 bushels of wheat-red and white. Since the war the South has taken far more interest in cereals than ever before, and we are pleased to see that efforts are being made by the Charleston merchants to secure the sale and transportation of these articles. The planters throughout the State anticipate large yields from their wheat crops, and they could do no better than to consign them to was the favorite packet between this city and the known for their probity and fair dealing. The merng this thoroughfare have clubbed together, and own the pumps in common. By this served from decay or blemish as long as life lasts? the entire street receives the sprinkling. On Tuesday night a grand movement was made which has eclipsed any previously attempted. A pipe was placed in the fire well near the corner of Church and Broad streets, and another laid across Broad, with outlets at each corner, a force pump in the Library yard, worked by stalwart Ethiopians, furnishes the necessary water power, and by at-taching the hose to the different pipes, both Broad and Church streets can be sprinkled for a consid-

As it is a vain dream to expect that water will ever be introduced into the city, we hail these innovations with delight, and commend the action of the Broad street merchants, who have taken the matter in their own Lands, and have achieved a success that will cause their names to be gratefully remembered by the dusty public. It requires but a small outlay to place these pipes in position, and the good results to be seen from their use in Broad street should encourage the residents in other sections to try the experiment.

THE CROPS ALONG THE COAST.—The information received through our different exchanges, indicates that the crops will be far larger and better than for many years. This is not confined to one locality, but the good news comes from North, South, East and West. The planters and farmers have learnt wisdom by sad experience, and the crop of cereals in the Southern States is unusually promising—corn and wheat having been made more of specialities than ever before. The wheat crop, in particular, is very forward, and shipments have already been made from different points; These samples are entirely free from any defects,

and readily command the best market prices. The sea island and coast plantations near the city have been worked with an energy that will repay the proprietors by an abundant harvest. At Edisto and the adjacent islands, large tracts have been planted with the long staple cotton, and both the quantity and the quality will exceed the expectations of the planters. MILITARY MOVEMENTS-The following officers and troops arrived in this city yesterday by the Emily B. Souder: Major BISSELL, Captain G. V. WEIR, Captain W. B. BECK, Major HEAD, Lieut E. R. HILLS, Lieut. GRAHAM, Dr. WRIGHT, and 365 United States troops. These troops came from Fortress Monroe via New York, and are a portion of the command of Gen. BURTON.

Brevet Brigadier-General H. S. Burron, Colonel of the 5th U.S. Heavy Artillery, who has been in ommand at Fortress Monroe for some time past, arrived in this city, by the land route, and is stopping at the Mills House. General Buaron is favorably known to the South as a gentleman and soldier. He brings with him the good wishes of the Virginians; and his generous treatment of a State prisoner will not soon be forgotten. We trust that the change in his command will not alter the friendly feelings now entertained for him by the South.

FIRE.—Between two and three o'clock yesterday morning, the alarm of fire was sounded, and smoke was seen issuing from the premises occupied by Mr. S. Woolf, in King street, between Liberty and Wentworth. The flames proseeded from a kitchen in the rear of the house, but the firemen were soon on the ground, and succeeded in confining the damage to that building. Mr. Woolf owned the property, and the house was insured in several Northern agencies, but there was no insurance on his stock. The kitchen had been occupied by some colored parties, who had been notified to leave by Mr. Wool, and it was supposed that the building was fired by them for revenge. As the gate of the yard was never closed, the access to the premises was easy, and it was thought that the late inmates had entered the kitchen and set fire to the second story. The promptness of the firemen prevented the flames from spreading, and the damage will hardly exceed a few hundred dollars. Lieut. HENDRICKS and his force were present with their tarpaulins, but the exertions of the firemen prevented their

A National Medicine.

One can hardly pick up a newspaper or turn a street corner now-s-days that he does not find, staring him in he face, the announcement that Prof. So-and-So has ust discovered a medicine which is a panacea for all the ills that flesh is, or may be heir to. These "wonderful" then disappear from public notice. The reason of their sudden extinguishment is apparent. They were humbugs. At the outset all medicinal preparations have an qual chance for success, as all are equally unknown but the chaff is soon winnowed from the grain by the practical test which an unprejudiced public applies to all things. There are but iew preparations of medicine which have withstood the impartial judgment of the people for any length of time. One of the few which we have now in mind, and which has been a long time familiar to nearly every household in the land, is the celebrated HOSTETTER'S STOMACH BITTERS. Their almost universal sale and use, and their emphatic endorsement from all portions of the country, compel the admission that they must be a specific for the ailments for which they are recommended. Letters before us attest their efficacy in diseases of the throat, bowels and liver. In that truly terrible complaint, dyspepsia, they are regarded as a sure cure. In Pittaburgh, where these Bitters are manufacthred, their sale for home use is immense. This fact alone speaks volumes in their favor .-Extracts from the Muscatine Courier, Iowa, Feb. 7, 1867. I have always recommended the Faber Polygrad
Lead Pencils as the only pencils fitted for both ornamen
tal and mathematical drawing; but, after a thorough
trial of the American Polygrade Lead Pencils, man
utactured by the American Lead Pencil Company, New
Vock, I find them superior to any pencil in use, even to York, I find them superior to any pencil in use, even the Faber or the old English Cumberland Lead Pencil ne raper or the old English Cumperland Lead Penci leing a superior pencil for sketching, ornamental an aechanical drawing, and all the ordinary uses of a lea pencil.

These pencils are very finely graded and have a very smooth lead; even the softest pencils hold the point well; they are all that can be desired in a pencil. It gives me great pleasure to be able to assure Americans that they will no longer be compelled to depend upon Germany or any other foreign market for pencils.
